

# **Targeted Communications for Microcode Updates using Dedicated LUNs**

## **ABSTRACT**

[00051] Disclosed are a system, a method, and article of manufacture to provide for microcode updates for devices and libraries attached to Storage Area Networks. Exemplary embodiments include updating microcode residing in nonvolatile memory using Logical Unit Numbers assigned to specific storage components. Components receiving microcode updates include data storage devices, docking stations, removable hard disk drives, robotic accessors and library controllers.
